MANAGEMENT DISCUSSION AND ANALYSIS

Introduction

Management Discussion and Analysis mainly comprises of the statements which, inter-alia, involve predictions based on perceptions and may, therefore, be prone to risks and uncertainties. It is the sum total of the Company's expectations, beliefs, estimates and projections which may be forward looking within the meaning of applicable laws and regulations. The actual results could differ materially from those expressed herein specifically or impliedly.

a) Core Business and products

The core business of the Company is manufacturing and marketing of Synthetic Blended Yarn.

b) Industry structure and its development

In India, many states announced Capital subsidy and interest subsidy apart from Technology Upgradation Fund Scheme (TUFSS) announced by Government of India for New investments in Textile Sector. However, the pace of investments was not higher than the previous years due to reduced yarn export and downward trend of oil price from September 2014 to March 2015.

With positive sentiments about consistent growth projections for India, we expect to do well in coming year.

c) Overview of the company's performance

During the year 2014-15, the production of Synthetic Blended Yarn was marginally lower i.e. 184 lac kg as compared to 185 lac kg in 2013-14 and the gross revenue increased by 3% from Rs.307 crores to Rs.316 crores in 2014-15. Your company achieved a net profit Rs.18.85 crores in 2014-15, which is marginally lower than last year which was due to uncertainty in the market because of decreasing trend in the prices of the Petroleum Products. The earnings per share for the year 2014-15 was Rs.8.72, as compared to the previous year's Rs.9.91.

d) Opportunities, threats/risks and concerns

1. Opportunities & Threats:

We expect that there will be good growth potential in Apparel sector, because of premium brands pushing their sales through online e-commerce. With the growth of Automobile industries & construction industries, demand for automotive fabrics and home textiles also will grow. The awareness of fashion amongst the youngsters is pushing up per capita consumption of Textiles in India, which is an opportunity.

The downward trend in Petroleum products creating uncertainty in the Textile chain as a whole, resulting which there may be fall in the yarn prices & profitability.

2. Risks & Concerns:

Volatile oil prices directly influence pressure on Polyester Fibre prices almost on daily basis. This cannot be passed on to the customers on day to day basis. Hence new element of risk has been introduced in yarn industry. Also the non-availability of trained/skilled man power is a matter of concern.

e) Segment-wise performance

The Company has only one line of business, namely, manufacturing of Synthetic Blended Yarn. The Company has no activity outside India except export of yarn manufactured in India; therefore, there is no geographical segment and no segment wise information is required.

f) Outlook

The company continues to modernize its plant and machinery and add balancing equipment. This would enable the company to improve productivity and widen its product range and improve the quality of its products.

The company's performance in the current year is expected to be satisfactory.

g) Internal control system

The company has a professional internal control system, which provides adequate safeguards and effective monitoring of transactions. The company has a strong internal audit system and an independent Internal Auditor. The Internal Auditor reports to the Chairman & Managing Director and the Audit Committee of the Board. Personnel of the Internal Auditor conduct periodical audits in all the areas to ensure that the company's control mechanism is properly followed and all statutory requirements are duly complied with.

h) Discussion on financial performance with respect to operating performance

The operating performance of the Company has been discussed in Directors Report under the head Financial Results, Operations and Prospects. The profit before tax for the year 2014-15 was at Rs 28.75 crores as against Rs.33.27 crores in the year 2013-14.

i) Developments in human resources and industrial relations

The company treats its human resources as its most important asset and believes in its contribution to the all-round growth of the company. Your company's progress is a reflection and outcome of the human resources it has. Your company has fostered a culture of ownership, accountability and self-evaluation that encourages employees to continuously improve on their efficiency. The industrial relations remained cordial thought the year.

j) Cautionary Statement

Statements in the Management Discussion and Analysis describing the Company's expectations or predictions may be forward looking within the meaning of applicable laws or regulations. Actual results may differ materially from those expressed or implied.

- l) **Leases**
Finance leases or similar arrangement, which effectively transfer to the company substantially all the risks and benefits incidental to ownership of the leased items, are capitalized and disclosed as leased assets. Finance charges are charged directly against income.
Leases where the lesser effectively retains substantially all the risks and benefits of ownership of the leased assets are classified as operating leases. Operating lease payments are recognized as an expense in the Profit and Loss Account on a basis, which reflect the time pattern of such payment appropriately.
- m) **Earnings per Share (EPS)**
The earnings considered in ascertaining the company's EPS comprise the Net Profit or Loss for the period after tax and extra ordinary items. The basic EPS is computed on the basis of weighted average number of equity shares outstanding during the year. The number of shares for computation of diluted EPS comprises of weighted average number of equity shares considered for deriving basic EPS and also the weighted average number of equity shares which could be issued on the conversion of all dilutive potential equity shares. Dilutive potential equity shares are deemed converted as of the beginning of the year unless they are issued at a later date. The diluted potential equity shares are adjusted for the proceeds receivable assuming that the shares are actually issued at fair value. The number of shares and potentially dilutive shares are adjusted for shares splits/reverse share splits (consolidation of shares) and bonus shares, as appropriate.
- n) **Taxes on Income**
Tax expense for the year comprises of current tax and deferred tax. Current taxes are measured at the current rate of tax in accordance with provisions of the Income Tax Act, 1961.
Deferred tax Assets and Liabilities are recognized for future tax consequences attributable to the timing differences that result between taxable profit and the profit as per the financial statements. Deferred tax assets and liabilities are measured using the tax rates and tax laws that have been enacted or substantively enacted at the Balance Sheet date.
Deferred tax assets are recognized on unabsorbed depreciation and carry forward of losses under tax laws to the extent there is virtual certainty that sufficient future taxable income will be available against which such deferred tax assets can be realized. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in the Profit & Loss Account in the year of change.
- o) **Grants/Subsidies**
Generally grants/subsidies are recognized where there is reasonable assurance that the company shall comply with the conditions attached to them and when such benefits have been earned by the company and is reasonably certain that the collection may be made. Grants/Subsidies related to revenue are credited to the Profit & Loss Statement or are deducted in reporting the related expenses.
- p) **Provisions**
A provision is recognized when an enterprise has a present obligation as a result of past event; and it is probable that an outflow of resources will be required to settle the obligation, in respect of which a reliable estimate can be made. Provisions are not discounted to the present value and are determined based on the best estimate required to settle the obligation at the Balance Sheet date. These are reviewed at each Balance Sheet date and adjusted to reflect the current best estimates.
- q) **Impairment of Assets**
The carrying values of assets of the cash-generating units at each balance sheet date are reviewed for impairment. If any indication of such impairment exists, the recoverable amounts of those assets are estimated and impairment loss is recognised, if the carrying amount of those assets exceeds their recoverable amount. The recoverable amount is the greater of the net selling price and their value in use. Value in use is arrived at by discounting the estimated future cash flows to their present value based on appropriate discount factor.
- r) **Contingent Liabilities**
Contingent liabilities are determined on the basis of available information and are disclosed by way of Notes to Accounts.
